Technology Enhancement Grant

Technology Plan

Technology is the technical means people use to improve their surroundings. It is also knowledge of using tools and machines to do tasks efficiently. For the purpose of the Technology Enhancement Grant and your organization's technology plan the word "technology" defines all digital hardware, software, video and graphic capabilities, lighting and sound systems, and training in the use of this digital equipment.

The purpose of the technology plan is to document current technology assets, needs, and long range goals.

The technology plan helps an organization to use technology as a tool to accomplish its mission, save money on technology, buy what is needed, avoid crisis, and use staff time more effectively.

Below is a suggested outline for you to use when developing your organization's technology plan, but you are not limited to this format. There is no maximum or minimum length for the plan. The technology plans of small organizations may be less than one page in length, while organizations with more complicated technology systems may need ten or more pages.

If you have questions please contact Foster Billingsley at the Virginia Commission for the Arts (804) 225-3132 or foster.billingsley@arts.virginia.gov.
